

Andrej A. Romanovsky's publications

Articles cited > 60 times (ISI Web of Knowledge or Google Scholar) are marked as *Impact papers*.

Liu E, Lewis K, Al-Saffar H, Krall CM, Singh A, Kulchitsky VA, Corrigan JJ, Simons CT, Petersen SR, Musteata FM, Bakshi CS, Romanovsky AA, Sellati TJ, Steiner AA. Naturally occurring hypothermia is more advantageous than fever in severe forms of lipopolysaccharide- and E. coli-induced systemic inflammation. *Am J Physiol* 2012 (in press).

Romanovsky AA. The inflammatory reflex: the current model should be revised. *Exp Physiol* 2012 (in press).

Almeida MC, Hew-Butler T, Soriano RN, Rao S, Wang W, Wang J, Tamayo N, Oliveira DL, Nucci TB, Aryal P, Garami A, Bautista D, Gavva NR, Romanovsky AA. Pharmacological blockade of the cold receptor TRPM8 attenuates autonomic and behavioral cold defenses and decreases deep body temperature. *J Neurosci* 32: 2086-2099, 2012.

Wanner SP, Garami A, Pakai E, Oliveira DL, Gavva NR, Coimbra CC, Romanovsky AA. Aging reverses the role of the transient receptor potential vanilloid-1 channel in systemic inflammation from anti-inflammatory to proinflammatory. *Cell Cycle* 11: 343-349, 2012.

Steiner AA, Molchanova AY, Dogan MD, Patel S, Pétervári E, Balaskó M, Wanner SP, Eales J, Oliveira DL, Gavva NR, Almeida MC, Székely M, Romanovsky AA. The hypothermic response to bacterial lipopolysaccharide critically depends on brain CB1, but not CB2 or TRPV1, receptors. *J Physiol* 589: 2415-2431, 2011.

Garami A, Pakai E, Oliveira DL, Steiner AA, Wanner SP, Almeida MC, Lesnikov VA, Gavva NR, Romanovsky AA. Thermoregulatory phenotype of the Trpv1 knockout mouse: thermoeffector dysbalance with hyperkinesis. *J Neurosci* 31: 1721-1733, 2011.

Wanner SP, Garami A, Romanovsky AA. Hyperactive when young, hypoactive and overweight when aged: Connecting the dots in the story about locomotor activity, body mass, and aging in Trpv1 knockout mice. *Aging* 3: 450-454, 2011.

Romanovsky AA. Selective brain cooling in humans: we don't fly, but we walk just fine (Letter). *J Appl Physiol* 110: 577, 2011. This letter is a part of the following publication: Crandall CG, Brothers RM, Zhang R, Brengelmann GL, Covaciu L, Jay O, Cramer MN, Fuller A, Maloney SK, Mitchell D, Romanovsky AA, Caputa M, Nordström CH, Reinstrup P, Nishiyasu T, Fujii N, Hayashi K, Tsuji B, Flouris AD, Cheung SS, Vagula MC, Nelatury CF, Choi JH, Shrivastava D, Gordon CJ, Vaughan JT. Comments on Point:Counterpoint: Humans do/do not demonstrate selective brain cooling during hyperthermia. *J Appl Physiol* 110: 575-580, 2011.

Garami A, Shimansky YP, Pakai E, Oliveira DL, Gavva NR, Romanovsky AA. Contributions of different modes of TRPV1 activation to TRPV1 antagonist-induced hyperthermia. *J Neurosci* 30: 1435-1440, 2010.

Romanovsky AA, Garami A. Prostaglandin riddles in energy metabolism: E is for excess, D is for depletion (Editorial). *Am J Physiol* 298: R1509-R1511, 2010.
